# Kansai Economic Insight Monthly 2024/11/25

# Vol.139 October/November

▼APIR's monthly report "Kansai Economic Insight Monthly" is an analysis of economic trends in the Kansai region and the Kansai-related sectors of China's economy.

▼Authors: Yoshihisa Inada (Konan University Professor Emeritus & Director of the APIR Center for Quantitative Economic Analysis), Norihiko Toyohara (Kwansei Gakuin University Professor), Chiu-Wei Kuo, Yani Karavasilev, Zhaoying Lu (Research Fellows), Shigekazu Yoshida, Ryosuke Nomura (APIR Research Promotion Officers), Ei Miyamoto (Chief Program Officer and Researcher), Yosuke Nitta (Program Officer and Researcher).

▼The term "Kansai" in this report is identical to the term "Kinki" used by ministries and agencies publishing statistical data. It includes six prefectures: Shiga, Kyoto, Osaka, Hyogo, Nara, and Wakayama.

## Highlights

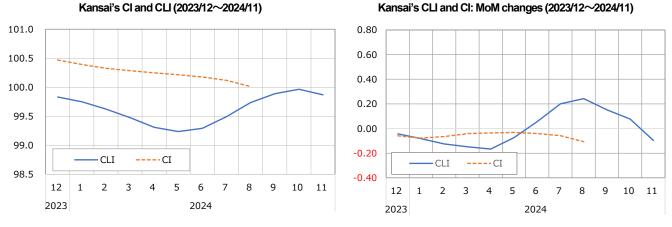

## Kansai's economy is deteriorating, but likely to return to a growth trajectory. Domestic demand is expected to recover, but the deceleration of overseas economies poses risks.

- Kansai's economy is currently deteriorating, but it is likely to return to a growth trajectory. The composite index (CI) for current economic conditions kept deteriorating MoM. The three-month moving average of the CI index deteriorated too, resulting in an automatic downward revision in our assessment of the economy.
- On the other hand, the trend in Kansai's composite leading indicator (CLI) did not meet the criteria for a downward revision in our assessment. As a result, we kept our outlook unchanged from the previous month. Whereas a gradual pickup in domestic demand is expected, a slowdown in overseas economies is likely to be a risk factor.
- In September, industrial production in the Kansai region increased for the first time in two months, mainly driven by the production of chemicals, transportation machinery, and ceramic, stone and clay products. On a quarterly basis, Q3 was the second consecutive quarter QoQ increase, but the pace of recovery remained slow.
- In September, the unemployment rate deteriorated for the first time in two months. The number of labor force and engagement also fell sharply. The employment rate fell and the recovery of the employment environment is losing steam. In Q3, both the number of new job offers and the number of job seekers decreased.
- Nominal ages in August rose YoY for the ninth month in a row. However, as the impact of summer bonus payments faded, the growth rate decelerated. Real wages kept declining.
- In September, sales by large retail stores increased YoY for the 36th consecutive month. This was despite a reactionary drop in the sales of department stores from the previous year's championship-related sales. On a quarterly basis, in Q3, the figure increased for the 12th consecutive quarter.
- The number of new housing starts in September increased MoM for the second month in a row. However, the Q3 saw the first decline in two quarters, implying that the housing market is stagnant.
- The volume of completed construction work in September increased YoY for the sixth consecutive month, but it decelerated. Q3 saw a YoY decline for the first time in two quarters. The value of public works contracts in October increased YoY for the third consecutive month, but the increase has been slowing.
- The Diffusion Index (DI) fur current business sentiment in October improved for the first time in three months. The hotel industry was a contributing factor. The DI for future business outlook improved for the first time in two months. The increase in inbound tourism and expectations for the year-end sales had a positive impact.
- ✓ In October, the trade balance remained positive for the ninth consecutive month, but it also kept shrinking YoY for the second consecutive month. By region, exports from and imports to Asian countries increased, while trade with the US shrank.
- ✓ The number of foreign visitors entering Japan via Kansai International Airport in October was the highest ever for that month.
- ✓ In October, consumption in China saw an accelerated recovery, but the recovery in production remained sluggish. The sluggish labor market and the ongoing recession in the real estate market are likely to make it difficult for domestic demand to emerge from its slump. Therefore, in Q4, China's economy is not expected to improve significantly from the previous quarter.
