

Japanese Economy: Analysis and Forecasts No.149

28 Aug, 2024

A Macroeconomic Analysis Project

► This report is a summary of the economic analyses and forecasts made by APIR's macroeconomic analysis project team.

► The project team consists of young professionals from member companies and APIR researchers, and is headed by Yoshihisa Inada, Director of the APIR Center for Quantitative Economic Analysis and Professor Emeritus of Konan University.

► This report and the forecasts in it were co-authored by Yoshihisa Inada and Mitsuru Shimoda from the Japan Applied Research Institute.

► This project is part of a 40-year research collaboration between young business professionals and academics, and its forecasts are used widely.

► The project was originally established by Chikashi Moriguchi and Kanemi Ban, Professors Emeritus of Osaka University. In 2005, we incorporated Current Quarter Model (CQM) forecasts into our quarterly macroeconomic forecast model.

► Aiming to provide a timely response to changes in the economy, this report has been published quarterly since 2004.

Forecast Highlights

Moderate recovery expected, driven by growth in real wages

- Real GDP growth forecast: +0.4% in FY 2024, +1.2% in FY 2025 -

- ◆ According to the first official advance estimate GDP released on 15 August, real GDP increased by an annualized +3.1% (+0.8% QoQ) in Q2 2024, marking the first increase in two quarters. The figure was higher than the market consensus final forecast (+2.10%) and APIR's CQM final forecast (expenditure side: +1.4%).
- ◆ In terms of contributions to real GDP growth in Q2 (+0.8% QoQ), domestic demand made a positive contribution for the first time in five quarters with +0.9 percentage points (pp). Therein, private demand made a positive contribution for the first time in two quarters with +0.6 pp. The temporary impact of the cutbacks in automobile production following a fraud scandal in the previous quarter faded, with private final consumption expenditure growing substantially, and business investment and exports increasing. Net exports, on the other hand, made a negative contribution for the second consecutive quarter (-0.1 pp).
- ◆ On a quarterly basis, real GDP exceeded its pre-pandemic peak (Q3 2019) for the first time in two quarters. On an annual basis, according to the revised official estimate, real GDP growth in FY 2023 was +0.8% YoY, marking the third consecutive year of positive growth. The figure was revised downwards by -0.2 pp from the previous estimate (+1.0%) due to a downward revision in final government consumption expenditure.
- ◆ Looking at deflators, the domestic demand deflator for Q2 was +1.0% QoQ, marking the 14th consecutive quarter of inflation. As the terms of trade improved for the first time in two quarters, the GDP deflator accelerated from the previous quarter to +1.0% QoQ, marking the seventh consecutive quarter of acceleration in inflation. As a result, nominal GDP increased for the first time in two quarters, +1.8% QoQ, or annualized +7.4%. Nominal GDP in FY 2024 (607.9 trillion yen) exceeded the 600-trillion mark for the first time.
- ◆ We have updated our outlook for the Japanese economy in 2024-25, taking into account the first advance GDP estimate for Q2, as well as some new assumptions about exogenous variables. We forecast real GDP growth of +0.4% in FY 2024 and +1.2% in FY 2025. Compared to our previous forecast, the figure for FY 2024 was revised upwards by +0.2 pp, and the one for FY 2025 was revised downwards by -0.1 pp. Although a recovery is expected from Q3 onwards, the average growth rate for FY24 will remain low due to the fact that the first half of the year was the second consecutive negative growth. A balanced recovery in domestic demand and net exports is expected in FY 2025.
- ◆ Real gross wages in June increased by +1.1% YoY, marking the first increase in 27 months. The positive turnaround was due to temporary (bonus) payments on top of regular wages. Although their effect will dissipate from July onwards, real wages are expected to continue growing due to the high growth in regular wages, as well as the slowdown in CPI inflation. In addition, private consumption is expected to keep growing in Q3, as the effects of the flat-rate tax cut will lead to an increase in disposable incomes.
- ◆ Consumer price inflation will slow down in the second half of FY 2024, after remaining high in the first half. We forecast a core consumer price inflation rate of +2.3% in FY 2024, and +1.6% in FY 2025. Both figures have been revised downwards by -0.1 pp from our previous forecast. In view of the improving terms of trade, we expect the GDP deflator to decelerate to +2.3% in FY 2024 and +1.6% in FY 2025.

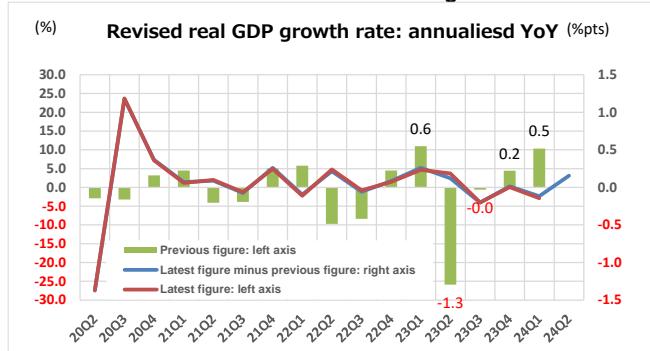

Forecast Summary

	Current forecast (2024/8/19)				Previous forecast (2024/7/2)

USA real GDP (%, calendar year)	1.9	2.5	2.6	1.6	1.9	2.5	2.6	1.6

Note: Figures on private consumption, government spending, changes in private and government inventories and external demand represent contribution ratios. The rest of the figures reflect YoY changes. The crude oil price is the average of the WTI, Dubai and Brent Blend benchmarks. Highlighted columns represent actual values.

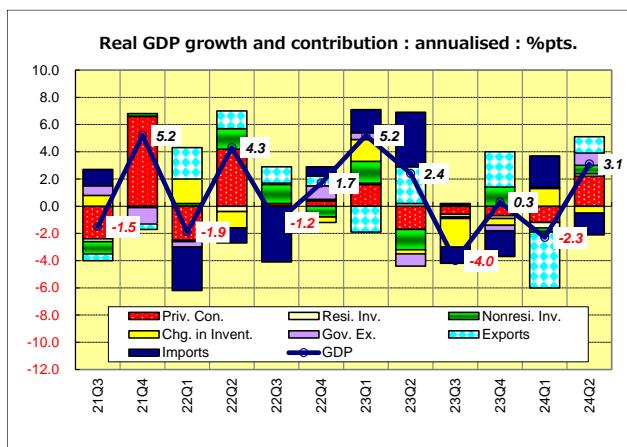

Forecasts at a glance

Although the current forecast features a significant revision for Q2 2023, the quarterly growth pattern remains unchanged

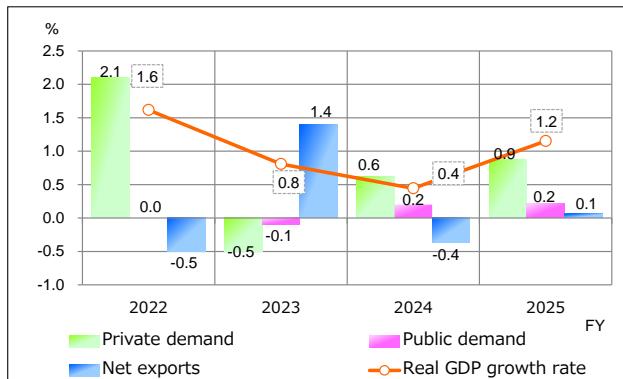

Note: The current forecast reflects the second advance estimate for Q3 2023. The previous forecast was based on the first advance estimate.

GDP growth rate in Q2 2024 turned positive for the first time in two quarters, thanks to a recovery in automobile production

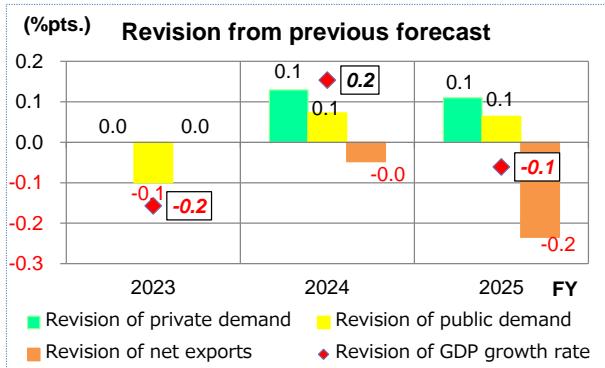

Contributions to real GDP growth

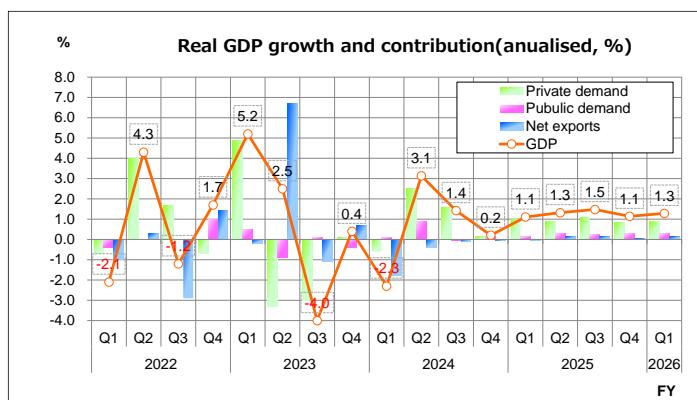

Note: Due to rounding, the total contribution of demand components does not necessarily match the real GDP growth rate.

Revisions from our previous forecast

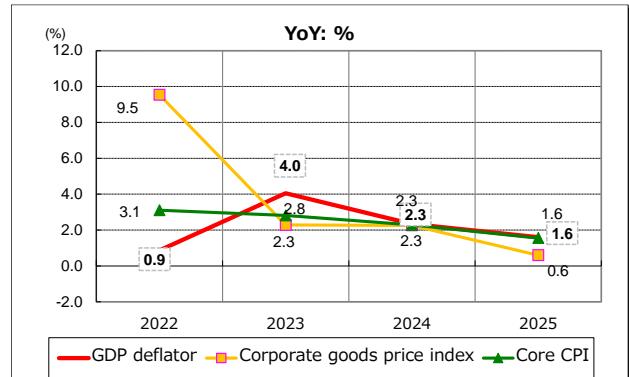

Note: Due to rounding, the total contribution of demand components does not necessarily match the real GDP growth rate.

Quarterly growth pattern: real GDP growth will turn positive in Q3, expected to pick up gradually thereafter

Core CPI inflation projected at +2.3% in FY 2024, and +1.6% in FY 2025, reflecting a downward revision of -0.1 pp from our previous forecast
